ANDRIESE

Projects

- Schools
- Libraries
- Offices
- Site Lighting
- Atria
- Hospitality

Electric lighting design & consulting

- New construction
- Renovation
- Energy studies / code compliance
- Life cycle cost analysis
- Budgeting / cost controls
- System specifications
- Commissioning
- Light accurate computer rendering

Daylight harvesting

- Natural light integration
- Computer modeling
- Skylights & vertical fenestration specifications

Exterior lighting

- Reduce sky glow and light trespass
- Streetscapes
- Parks / landscapes
- Parking lots
- Outdoor lighting ordinances

Theatre Design / Consulting

- Stage lighting
- Video lighting
- Rigging systems
- Renovations and upgrades

Audio Video Design

- CTS Certified Technology Specialist on staff
- Budget planning / cost management
- Architectural integration

User training

- Programming and maintaining lighting control systems

Providing Evidence Based
Design Solutions

Daylight Analysis

Light Accurate Renderings

IlluminArt is a career professional lighting design firm providing expertise on projects worldwide. Our staff brings broad experience in architecture, industrial design, interior design, theatrical lighting, control systems and electrical design. Our project team works collaboratively with you to accomplish your project goals.

It's important that a lighting designer be a career professional, involved in education and awareness of ever evolving lighting issues and developing new technologies, to provide the best possible service to their clients and work in their best interests.

We believe lighting needs to be functional as well as beautiful. Our cost-management services help project owners by:

- Reducing initial equipment costs from suppliers
- Dramatically reducing long-term operations costs / energy and maintenance
- Illuminart does not sell equipment. We specify the best solutions for your project without any conflict of interest.

Sustainable Lighting Supports

Human needs / designs that use techniques to support health, well being, visibility and productivity

Economic Objectives / services that will minimize initial equipment costs with specifications that reduce operations costs

Environmental Requirements / lighting that reduces carbon emissions, hazardous waste and controls outdoor light pollution

Aesthetic Goals / light that improves interior and exterior design aesthetics

Please visit our website for more about our services and to see our *Sustainable Lighting Video* which illustrates our story.
